

WORK EXPERIENCE

Byepo Technoloies

Software Developer • Sept 2021 - Present

- Spearheaded the development of Ninto Apps using a cutting-edge Test-Driven Development (TDD) approach, building the application's core functionality from the ground up
- Collaborate with cross-functional teams to identify and prioritize features and requirements
- Develop and execute unit tests, intergration test and perform system testing to ensure software quality
- Troubleshoot and resolve software defects and issues
- Conduct code reviews and provide feedback to improve code quality

Projects

Byepo Technologies

Ninto

- Developed a comprehensive digital health document management softwares.
- Seamlessly integrated the ABHA Indian government standards and protocols into the system, ensuring regulatory compliance and data security.
- Crafted a dynamic portfolio website for Nitno (Next.js for SEO)
- Developed three healthcare applications, including 'Ninto', tailored for doctors, clinics, and patients, enhancing medical workflows and patient care.
- Conducted rigorous unit, integration, and system testing to ensure software quality, enhance performance, and sustain application excellence.

Ninto Corporate

- Developed a employee onboarding software facilitating medical fitness and health assessments as prerequisites for new hires.
- Corporations can establish medical fitness assessment programs for their new hires in collaboration with select hospitals.
- Developed three applications, including 'Ninto corporate ', tailored for corporate clinics, employers, and employees, to streamline medical fitness and health assessments.
- Conducted rigorous unit, integration, and system testing to ensure software quality, enhance performance, and sustain application excellence.

GCC

- Developed software for the Greater Chennai Corporation (GCC) to monitor and manage the conditions of public restrooms in Chennai.
- Developed both map and table views to provide real-time visualization of statistical data regarding the state of public restrooms in Chennai.
- Developed three applications, including 'GCC,' customized for use by GCC administrators, the public, and employees, to optimize the monitoring and management of public restroom conditions in Chennai..
- Conducted rigorous unit, integration, and system testing to ensure software quality, enhance performance, and sustain application excellence.

Medical Campaign web app for Apollo Clinic (Madipakkam)

- Developed software for Apollo Clinic (Madipakkam) to facilitate medical campaign management and appointment booking with seamless online payment integration.
- This app is currently in production, with active users utilizing it to schedule appointments for campaigns and complete online payments.
- Developed three applications, including 'GCC,' customized for use by GCC administrators, the public, and employees, to optimize the monitoring and management of public restroom conditions in Chennai..
- Conducted rigorous unit, integration, and system testing to ensure software quality, enhance performance, and sustain application excellence.

Job fair 2024 website (Permabalur)

- This website allows job seekers to create an account and securely upload their resumes.
- Users can also update or replace their resumes as needed, ensuring their most up-to-date information is accessible to recruiters.

Petition Management software for Arun Nehru MP

- Developed two distinct applications: Citizen Portal for petition submission and engagement, and Admin Dashboard for the MP's office to manage citizens' information, review and accept volunteer applications, post announcements, and manage job requirements.
- Citizens register via Aadhaar number to submit petitions, track petition status, view announcements, manage profile information, and apply for volunteering roles. The system also integrates a CRM API for efficient announcement management.

EDUCATION

Bachelor of Information Technology

DMI College of Engineering • 2017–2021 • 7.5 CGPA

ACHIVEMENTS

Achieved Second Place

JPR College • Project Expo • 2020–2021

Achieved Second Place, Awarded By Mylswamy Annadurai (ISRO)

National level Hackathon • 2020–2021

Achieved Second Place

REC College • Project Expo • 2020–2021

Achieved First Place

Project Expo • CLRI (Central Leather Research Institute) • 2020

SKILLS

- Problem-solving
- Analytical skills
- Interpersonal Skills
- Communication
- Collaboration
- Leadership
- Critical thinking
- Attention to detail

STACKS

- React.js
- Next.js
- Node.js
- Electron
- PWA & TWA
- Express.js
- Cordova
- React Native
- Android Studio
- Expo

TESTING & DATABASE

- Cypress
- Selenium
- MongoDB
- Firebase
- Mocha

PERSONAL PROJECTS

Aelay Publishing

- Developed a hybrid mobile application that facilitates book uploads, provides real-time monitoring of the publishing status of those books and conveniently place orders for physical copies.
- Authors can receive royalties based on the book's popularity. Developed a comprehensive dashboard system for adding, deleting, and updating books and user profiles while also managing user royalty points.

Carcaran

- Developed four distinct software applications:
- Carcarn users - Enables users to buy and sell cars, whether they're dealing with dealerships or individual sellers.
- Carcarn admin - Allows administrators to efficiently add, delete, and update user profiles, vehicle listings, and dealer information.
- Carcarn DRM - Effectively manage dealerships.
- Carcarn Dealers - Enables dealers to seamlessly add, delete, and update their inventory of cars within their dealership.
